

Woods & Finishes

All fixtures are available in Oak and Maple. Some fixtures are also available in wood-grained Melamine. Other types of wood are available for custom fixtures.

OAK, a hardwood, is very hard. Prominent and distinctive grain, reddish-brown color. Clear lacquer or stained finish recommended. **MAPLE**, a dense hardwood, is very hard. Grain is usually subtle. Blond to light reddish-brown color. Clear lacquer finish recommended. Does not stain well.

Fixtures are finished with Clear Lacquer unless stain or paint is specified. Natural clear lacquer prices are shown in **Black**. Stain prices are shown in **Blue** and Melamine prices are shown in **Red**. Other stains available by quotation.

Important Note: Sample stains on this page should be considered a reference only. Please request a stain sample, but please be aware that due to the variation in wood grains (and the resulting stain), final stain results will vary. Please see pages 209 & 210 for more information.
