Starter and Add-on Shelving units can be creatively configured and placed for maximum flexibility in merchandising. Single units or runs of starter and add-on units can be used against a wall, as partitions or as island displays.

Unique star configuration. As shown right, use any combination of heights and widths of 17-1/2" deep starter and add-on shelving units with two corner shelf kits. Lineal moulding available by quotation.

Same configuration as shown in drawing with stair-step corner shelf kits and site built Crown Moulding Cap. Lineal moulding for cap available by quotation.
